Innovation in Education: Preparing for the next 10 years

Professor Richard Black

SOAS, University of London

MINISTRY OF FINANCE
REPUBLIC OF INDONESIA

WIEF
WORLD ISLAMIC ECONOMIC FORUM
FOUNDATION

Recent innovations in higher education

- Increasing access to higher education
- Focus on problem-based learning, not technical skills
- Technology-supported learning: lecture capture, MOOCs and webinars
- Transnational education: branch campuses, education cities, student mobility

Disruption or evolution?

HE innovation: the next 10 years

- The world of ‘bots’: the automated student advisor
- Distributed learning: online ‘communities of practice’, blended models
- Integrated learning: closing the gap between teaching and research, and between learning and practice
