With a world ranking of 11th position, Malaysia is ranked the highest among the OIC countries, in terms of high-tech export values.

The closest rival to Malaysia is Indonesia, followed by Turkey and Kazakhstan.

With USD74 billion worth of high-tech exports, Malaysia commands a world share of 2.90%.

Malaysia’s closest rival, Indonesia, commands only 0.23% of the world’s share, which is unlikely to be an immediate threat to Malaysia’s lead in high-tech exports.
